

Engineer II

By Citizens Energy Group on 6/15/22 4:00 PM in CP&E

We have a career opportunity for a Mid-level engineer to join our team!

Under general supervision, the successful candidate will support engineering planning efforts and performs data analyses. They will also assist the business with overall Consolidated Planning efforts and Project Management Manual. Broadens knowledge and skill set in area of discipline. Furthermore, they will engage in interactions with consultants, other Citizens departments, and other agencies.

Essential Duties and Responsibilities

- Continues to learn and remains current on departmental design guides, standards, systems, engineering codes, and Citizens policies and procedures.
- Proactively applies Citizens Quality Program principles to deliverables. Demonstrates personal accuracy and supports continuous improvement and change management efforts. Assists to ensure deliverables are in compliance with the specific codes and standards suitable for the project.
- Prepares moderately complex engineering deliverables related to Consolidated Planning efforts. Updates Project Management Manual and training modules annually to incorporate feedback from internal stakeholders and improvements. Performs complex data analysis and develops recommendations for continuous improvement of planning efforts. Supports program development to identify next steps and approach for Business Units to reach planning objectives. Supports and provides information to report results to leadership. Collects, assimilates, and manages data for engineering planning work. May provide direction and guidance to others.
- Actively seeks to understand internal stakeholder interests through normal contact and interaction and communication with project leadership. Applies understanding of internal stakeholder interests to performance of the work under his/her responsibility. Communicate internal stakeholder interests and drivers to project team and develop approaches to accommodate these concerns.
- Understands and adheres to budget, schedule, and quality requirements.
- Performs other duties as assigned.

Required Qualifications

- Bachelor's Degree in engineering from either an ABET accredited program or a recognized accredited program in their home country, or sufficient education acceptable by management.
- 2 years of related experience or 1 year of Citizens experience, or sufficient education acceptable by management.
- Valid driver's license in the United States, or alternate approved by management. State of Indiana driver's license required within 30 days of first day of employment.

Preferred Skills/Qualifications

- Additional education, certifications, licensing, experience and knowledge that would enhance the incumbent's ability to perform the job.
- Successful completion of Fundamentals of Engineering Exam and current Engineer-in Training Certification.
- Intermediate knowledge of engineering planning and construction processes and applicable guides and standards related to assigned engineering discipline. Intermediate ability to interpret engineering deliverable content as assigned. Basic knowledge of Citizens Quality Program, and construction and constructability practices and principles.
- Experienced in computer software in a Windows environment, Microsoft Office applications, PowerBI, and Oracle databases. Ability to work in office and field environment. Detailed understanding of utility systems.
- Demonstrated ability to work effectively and cooperatively with others. Strong analytical, problem solving and organizational skills. Demonstrated ability to prioritize project tasks.
