Quality

In all that we do,
our commitment to quality is clear.

From the experience of our skilled craftsmen to our command of the latest technologies,
we stand apart from the competition.

We take customer service seriously, and work hard to prove it everyday.

That's why when it comes to water supply contracting
and hydrogeologic services, we're PEERLESS!

Chair's Message

Mike Simpson

As I write this, my final article as Section Chair, January is coming to a close and the Annual Conference and Exhibits is just weeks away. Of course winter is in full swing and I can tell you it has really become tiresome. I cannot wait for Spring to arrive. My year as your Section Chair has been quite memorable. My favorite part is attending the Spring and Fall district meetings. I enjoyed the opportunity to speak and interact with so many water professionals.

Special points of interest:

- Annual Conference Program pages 10-13

As for your Section, it continues to improve and excel in many areas. One area that I'm extremely proud of is our MAC. This committee, headed by Roger Riddle, works tirelessly behind the scenes to insure that the Annual Conference and Exhibits are an effective educational and networking experience. This year, 2010, it was time to begin soliciting proposals for the contracts for the Annual Conference for years 2013, 2014, 2015. The committee took proposals from several facilities including the Marriott and conducted tours and meetings at those facilities to find the best package for our Association. In the end the Indianapolis Marriott Downtown, where we currently hold the meeting, offered the best and most effective package. In fact, the Marriott proved they wanted our continued business by making concessions that affected our current contracts. The highlight was the lowering of the room rate to \$139.00 per night and locking that rate in through 2015. That is just one of the many examples of the things your fellow water professionals are doing to make everyone's "job" a little better.

Finally I'd like to leave you with a portion of an article I wrote earlier this year. To me, the following is one of the most important things that need addressing and warrant your attention.

Our profession is only as good as those who are a part of it and everyone is needed, now more than ever. I am painfully aware of the economic conditions within our State and I do understand how budgets have been squeezed, if not flattened, because of what has transpired over the last twenty-four months. Even with our economic problems we should all be concerned that the direction we're heading in is one that will cause us to lose our connection with each other

Michael@mesimpson.com

and then lose our standing as the profession that provides safe water. I had this discussion with a friend and we were trying to decide what our meetings/conferences were all about. Are they educational and networking opportunities or are they networking and educational opportunities? It's the chicken vs. the egg syndrome. I believe that education and networking are the keys to our success no matter which emphasis or order you put them in. Attending workshops and/or the State Conferences gives every water professional an opportunity to learn from the presentations in the classrooms and learn from the experts in the exhibit hall. You will also have an opportunity to network with your peers from across this great State and share what each other is doing to make water safe to drink. I've been a party to discussions with folks from around the State trying to help someone solve an issue with their system. What's amazing is there's always someone in the group that had that similar problem and had a solution. This cannot happen if we don't belong and participate. As you prepare your 2011 budgets, please fight for your education, membership, training and conference line items and let your leaders know how valuable you are and your profession really is.

Education matters, Membership matters, YOU matter. We are water professionals and we are the profession that protects the public health through safe water.

Thank you again for allowing me the opportunity to serve as your Section Chair. I look forward to seeing all of you at the Section's Annual Conference and Exhibition in Indianapolis at the Marriott Downtown, February 22nd through 24th.

Direct from the Director

Dan Hood

This year's mid-winter board meeting was held in sunny, warm San Antonio, Texas. Unfortunately, when we arrived it was neither sunny nor warm. (When I say we I mean me and my body guard, aka my wife Pamela.) San Antonio was experiencing below normal temperatures. It was unbelievably cold, that's what the locals kept telling me. I was pretty happy with 52 degrees as when we left Valparaiso that morning the temperature was 1. That's right, 1 degree with a wind chill of -20 degrees. From our perspective San Antonio was warm.

On Saturday at the Board Special Session we went over the Treasurer's Report and the proposed 2011 budget. It's hard for me to get used to our Association's twenty-eight million dollar budget. After the budget review we had a presentation on Facilitating Partnerships followed by a round table discussion of other organizations that AWWA might partner with on particular items when we might have a common goal. Some of the groups were very successful at thinking outside the box and generating some creative ideas.

There was a membership update by Susan Franceschi, AWWA's Chief Membership Officer. The steady decline in membership and the reduction in number of dues paying members is very concerning. Our largest growing grade of membership is our Life Members, those individual members who have maintained continual membership for thirty years. Past practice has been that paying dues is optional for life members. I encourage all of you who are Life Members and are still working, to continue to pay your membership dues. Staff is evaluating the levels of individual membership and may recommend a plan to revise them.

The work session concluded with a presentation from the Diversity & Member Involvement Committee by fellow director Martin Garcia. Martin spoke about the committee's definition of Diversity, which is that Diversity isn't just about differences in sex, race, or religion, but also backgrounds, education, and experiences. There were a few closing announcements and we adjourned.

The Sunday board meeting started off with a welcome from our President, Joe Mantua, followed by a few announcements, roll-call, and the elections. First on the agenda was the election of the next AWWA President-Elect and four Vice Presidents.

The two candidates for President each had 5 minutes to speak and then the vote was taken. Next were the 5 minute presentations by the six candidates for Vice President, starting with the Director from Indiana. I thought he did a pretty fair job, got a few laughs and finished early. The other candidates each took their turn to speak and the vote was taken. There were three candidates for Director-at-Large and three candidates for Service Provider Director-at-Large. Following the elections we took a short break and there was a lot of handshaking and offering of congratulations all around. Some of the candidates, at least one that I know of, needed to make a wardrobe change and get back in their jeans.

After the break, the vote was taken to approve the items on the Consent Agenda which comprised about a hundred pages of our meeting notebook. Here's a short summary of those items: approval of changes to the bylaws for several sections - Atlantic Canada, Intermountain, North Carolina, Puerto Rico, South Dakota, and Wisconsin; and the following policy statements were approved - Management of Groundwater, Sustainability, Water Quality Control in the Distribution Center, Assignment of Continuing Education Credit and Professional Development Hours, and Water Use Efficiency.

There was one new standard, B300a Hypochlorites Addendum. There were thirteen revised standards. These ranged from B502 Sodium Polyphosphate to D104 Automatically Controlled, Impressed-Current Cathodic Protection for the Interior Submerged Surfaces of Steel Water Storage Tanks.

The board approved several action items and the Treasurer's report. One of the more interesting items was the ratification of Toronto as the future site for ACE 2023 and 2029. Toronto will be replacing Orlando in the six city rotation. Toronto's new Direct Energy/Allstream Centre is located five minutes from downtown Toronto. The two buildings are connected by an underground walkway. The exhibit space is over 470,000 sq. ft. of continuous space which gives us room to grow.

The most interesting item on the Treasurer's Agenda, for those of us from Indiana, was the ratification of the appointment of our very own John Seever to the Audit Committee. Thank you John for stepping forward and volunteering for what I'm sure must be a grueling task. I didn't particularly enjoy reviewing the line items of a twenty-eight million dollar budget and you volunteered to help audit it. We need more volunteers like John, those who are ready to roll up their sleeves and go to work for our association.

There were some other items on the agenda that are less exciting than those I've mentioned and the board meeting concluded right on schedule.

You'll notice this time I tried to be a professional and didn't write anything about all of the sitting.

Your Director ~ Dan

Committee Reports

Membership

Philip Smith, Chair

Why I Joined AWWA

Last time in this column, I asked the question; "What's your story about AWWA membership?" This issue's winner is Doris Morris. For her effort, Doris wins an AWWA pen with a LED light, laser and two-gigabyte flash drive properly packaged in the highly prized AWWA shopping bag.

AWWA Membership-25 Years

By Doris A. Morris

After reading Phil Smith's commentary in *News Leaks* about "Why I Joined AWWA" and receiving my AWWA 25-year membership pin the same week, I decided to express my appreciation for the many benefits of the membership "family."

The AWWA organization provided introduction to people working in the water industry. Early in my career, I needed "contacts" and jobs to pay the bills. The district meetings and annual conferences provided the learning curve for technical knowledge, but the listening to potential customers problems and needs within their water systems was the "edge" to get jobs and therefore keeping a paycheck.

My appointment to the national membership committee by Foster Burba presented opportunities to work with people from many different AWWA Sections for seven years. Each year the friendship bonds are renewed while attending the conference exhibit halls and "parties" at other sections and ACE.

The AWWA membership and water industry has provided me a "family" of hard working people who care about their families, neighbors and communities. The opportunity to be in many towns and cities throughout the years has left me with many memories and very respectful of "real" people who have had problems and joys in their families and communities.

We are a "family" of sharing and caring people who work to provide clean drinking water.

Thank you...Doris A. Morris

NB: Foster S. Burba of the Kentucky-Tennessee Section is past president (1992) of AWWA.

Competition

Jeff Morris, Chair

The annual Meter Madness Competition will be held Wednesday, February 23, 2011 at the Indiana Section's AWWA Conference. The following participants represent each of the five districts that competed and won at the individual fall district meeting competitions.

William Jones, Town of Edinburgh, representing the Southeast District.

Clint Buttery, Dubois Water Utilities, representing the Southwest District.

Jerry Smith, City of Carmel Water, representing the Central District.

Tim Sensibaugh, City of Ft. Wayne Utilities, representing the Northeast District.

Jason Kesler, Logansport Municipal Utilities, representing the Northwest District.

Eric Smith, Dubois Water Utilities, the 2009 Returning Champ.

The Indiana Section encourages everyone to attend the Wednesday night reception and cheer on the participants in this very exciting, spirited competition. The competitors will be assembling the Master Meter 5/8 x 3/4 positive displacement meter in hopes of securing their chance to represent the Indiana Section in the National Competition to be held at the ACE Conference in Washington D.C. in June of 2011.

Thanks in advance to everyone involved in this great competition. See you in a few weeks.

Beyond compare

But we'd like you to try it anyway

Can you find all these things anywhere else?

- ✓ High-quality manufacturers
- ✓ Eight experienced sales engineers
- ✓ On-site equipment and valve inventory
- ✓ Full-time, experienced parts department staff
- ✓ Capable and experienced service staff
- ✓ Free technical seminars in our training center
- ✓ Fast and accurate responses

Young Professionals

Emily Nelson, Chair

Do you have a desire to get plugged into AWWA but aren't sure how or if you have enough experience? Well stop right there... The Young Professionals (YP) group is just for you! The AWWA YP group is open to any member age 35 and under or anyone who is new to the water industry. We are an energetic group of AWWA members with much to offer the Association.

This year the YPs are coming together to kick off the Annual Conference with a Meet & Greet open to all AWWA young professionals. This will be a time to network with fellow YPs and to enjoy appetizers, drinks and plenty of good company! Feel free to join us on February 21 from 4:30pm to 5:30pm in the Santa Fe Room of the Indianapolis Downtown Marriott.

Also new to the conference this year is the First Annual "Fresh Ideas" Poster Competition. This competition is open to undergraduate and graduate students as well as professionals with less than 10 years of experience and is an opportunity for YPs to share the results of their work and/or academic projects.

As you can see, the YP Committee has been hard at work this year. YPs are the future of the water industry, and our goal is to provide networking, educational, service and social opportunities to help YPs get involved in AWWA. The YP Committee is planning events throughout the summer, so stay up to date on YP events and happenings by checking the website listed below or by joining the "Young Professionals – Indiana Section AWWA" group now on Facebook. If you would like more information about the YP Committee or are interested in signing up for the YP mailing list, contact Emily Nelson at the email listed below. (EmilyN@wesslerengineering.com) (http://www.inawwa.org/pages/youngpro_com.php)

BOXLOK

THE VALVE BOX ALIGNMENT DEVICE

- Aligns the Gate Valve to the Access Unit
- For use with Cast Iron Valve Boxes or 6" PVC Pipe Risers
- Two piece design requires no Valve disassembly
- Units are White for easy location of the operation nut
- Easily fits all AWWA C509 R/S Gate Valves up to 12"

Small Systems

Odetta Cadwell, Chair

Your AWWA Small Systems Committee is pleased to announce that the "Handbook for Board Members, Owners, Elected Officials, and Operators of Indiana Water Systems" has hit the streets. If you have not yet received your copy, or would like additional copies to share, let us know and we will be happy to send them to you. You can call the AWWA office at 866-213-2796 or email to mj-awwa@att.net.

We wish to thank Phil Smith of Smith Group Consulting for the vital role he played in getting this publication to press. Thank you, Phil!

At our recent Small Systems Committee meeting, it was decided to conduct (in conjunction with Indiana Rural Water Association) four Introduction to Backflow Prevention and Cross Connection Control workshops in 2011. The tentative dates are:

- April 26 & 28, 2011 – Northwest Indiana locations TBD
- May 10 & 11, 2011 – Southwest Indiana locations TBD

Registration information will be sent later, and details will be posted on both the Indiana Section AWWA website (www.inawwa.org) and the Indiana Rural Water Association website (www.indianaruralwater.org).

We are also considering other workshop options for later in the year.

FYI-Small Systems will continue to make its way into your mailbox in 2011. We hope to publish one in April and one in October. Please let us know if there are any topics you wish us to address in this newsletter or any workshop topics you wish us to consider.

Hope to see you at the IN AWWA Annual Conference at the Indianapolis Downtown Marriott!!

Silent Auction

Cathy Fejer, Chair

We are just about a couple weeks away from the conference and please do not forget to stop by the **Water For People Silent Auction**. I am pleased to announce that last year's efforts raised over \$5,000 for this great charitable organization and we are looking forward to beat that this year with your generosity and support.

We hope that your company will participate in the Silent Auction this year. Each year since the Silent Auction's inception, we have increased support and participation. The Silent Auction builds interest throughout the conference and is a good way to showcase your business.

The items are up for bid all day Tuesday and then placed at the "Meet and Greet" where the final bids take place. Your company's name will be published at the conference and in the Spring issue of News Leaks as well. It is never too late to donate an item or two. We are also happy to accept donations from individuals. If it slipped your mind you may always bring it to the conference and I will get the item displayed or you may e-mail me at cfejer@valpo.us so I can get the appropriate forms ready before hand.

The Silent Auction is a good way to get more of our Section members connected with Water for People. Your support will help us not only advertise your business, but get the word out about this great AWWA supported charity.

DIXON ENGINEERING INC. Est. 1981

Engineering and Inspection Services for the Coating Industry

Since 1981, Dixon Engineering has been recognized as a leader in the storage tank and coating inspection industry. With over 1250 municipal, state, and federal clients, Dixon has experience with virtually any type of water/wastewater storage tank and coating maintenance needs - specify Dixon Engineering. Let our expertise help you preserve the value of your facilities.

Dixon offers the following services to meet your engineering and inspection needs:

Inspection Services

- Tank Maintenance
- Underwater
- Warranty
- Abrasive Blast Cleaning
- Steel Coating Applications
- New Tank Construction
- Antenna Installation
- Cathodic Protection
- Welding/Repair
- Concrete Coating Applications

Engineering Services

- Tank Repairing Specifications
- Specification Review
- Cathodic Protection Specifications
- Antenna Design and Review
- Structural Repair Specifications
- Tank Raising and Relocation
- Tank Demolition
- Coating System Failure Analysis
- Treatment Plant Coating Specs

District Updates

Northwest District

Randy Wynn, Trustee

Good day all, hope everyone is having a healthy and uneventful winter. Here in the northwest we are busy working on a great program for spring meeting. We are finalizing plans to be in Monticello on May 20th. It looks to be a great program followed by an afternoon of golf. Hope to see everyone in February at the section conference, but if not, please plan on attending the Northwest District meeting. If you ever have ideas for a meeting please feel free to share those with any of the officers. Stay safe and warm and see you in Indianapolis.

The power of integration

Engage stakeholders, preserve resources, protect the environment, stimulate economic vitality. Making life better in smart and sustainable ways.

Southeast District

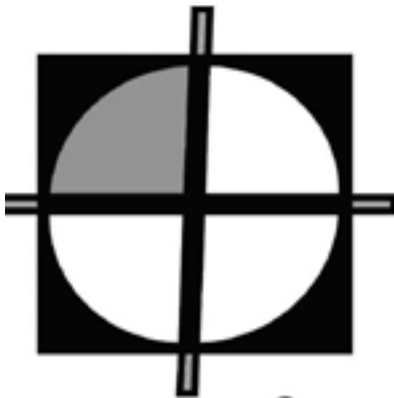

Kurt Riedman, Trustee

The Southeast District is alive and well!

Our spring meeting will be in Cambridge City on Tuesday, May 3, at the Golay Center. As of now we will be having a discussion on SCADA systems. The remainder of the program has yet to be determined.

Lunch will be catered by the folks at the facility. Additional information on the program, location, and possible after-meeting activities will be forthcoming.

Hope everyone is well and is able to make it to Indianapolis in February!

Southwest District

Ed Hollinden, Trustee

Greetings from the Southwest!

Jasper will be hosting the SW District Indiana AWWA meeting on May 4th, 2011. At this time the speakers and topics have not been secured but there will be a clay pigeon shoot to be held after the meeting as a creative option for afternoon activities.

Your 2011 Southwest District Officers:

Dave Bergman	President	Todd Williams	Vice-President
Ed Hollinden	Secretary	Darrel Heisler	Treasurer
Tim Nelson	Trustee		

See you all in the Spring!

BRASS FIRE HYDRANT WATER PRESSURE RELIEF VALVES

The NORMAN NOE CO INC offers brass water pressure relief valves that are used to help relieve water main pressure when a water tank is "off line" for maintenance or emergencies. The adjustable valves are preset to 65 psi and come complete with 2-1/2 inch brass fire hydrant and fire hose discharge adapters and a 0-100 psi pressure gauge.

To order one or more valves go to
www.normannoewater tankinspection.com and click on Relief Valves,
or call 317-933-2274
